EXPERIENCE

Full-Stack Developer, Tinydata Technologies Pvt. Ltd.

Oct 2025 – Mar 2026 | Remote

- Developed a cross-platform mobile application using React Native for a legal practice management platform, enabling users to manage cases, clients, and documents on mobile devices.
- Integrated mobile frontend with backend services via REST APIs, ensuring seamless data synchronization between web and mobile platforms.
- Built features such as case tracking, document access, and appointment management, enhancing accessibility and overall user experience.

Tech Stack: React Native, REST APIs

Web Developer, AXMILE Technology Pvt. Ltd.

Jun 2024 – Sep 2025 | Noida

- Contributed to a tech-driven platform connecting customers with local mechanics, helping digitize and streamline bike servicing operations.
- Created a full-featured admin panel using React and TypeScript to manage users, services and bookings, improving operational efficiency.
- Built functionalities such as user authentication, account management, and booking workflows, ensuring a smooth end-to-end user experience.

Tech Stack: React.js, Node.js, Express.js, MongoDB

SKILLS

- Frontend:** HTML, CSS, JavaScript, React.js, React Native
- Backend:** Node.js, Express.js
- Database:** MongoDB
- Tools:** Git, GitHub, VS Code, Postman, Android Studio

EDUCATION

Full-Stack Web Development, Acciojob

Aug 2023 – May 2024 | Gurgaon

Trained in full-stack development with a focus on JavaScript, React, Node.js, and MongoDB, applying best practices through multiple project builds.

B.Sc. Physics (Honors), University of Delhi

Jul 2018 – 2021 | Delhi

PROJECTS

E-Learning Platform

- Designed a role-based learning management system with secure authentication for students and instructors.
- Delivered dashboards for students to access courses, lectures, and tests, while enabling instructors to manage content efficiently.

Tech Stack: React.js, Node.js, Express.js, MongoDB

Typing Website

- Created a typing speed tester with random word prompts, providing real-time feedback on WPM and accuracy.
- Enhanced user engagement with multiple themes and smooth UI interactions.
- Integrated Firebase authentication for login/signup and stored user performance history in the database, displaying progress via charts and tables.

Tech Stack: React.js, Styled Components, Toastify, Firebase, Chart.js
